ABSTRACT

Tables are provided, summarizing Fall 1979 enrollment and student characteristics data for the Los Angeles Community College District (LACCD). The report first presents a district-wide profile of enrollment in six categories: day/evening, male/female, full-/part-time, freshmen/sophomores, first-time/continuing, and age 21 or over. This profile continues with an examination of student age and ethnic distribution, weekly student contact hours, student credit hours carried, the age distribution of students utilizing instructional television, overseas enrollment, comparative enrollments at other area colleges, admissions categories of entering students, and sources of new students. A narrative summary of these data reveals the following: (1) Fall 1979 enrollment in the LACCD rose to 130,896, a 5.1% increase over Fall 1978; (2) day enrollments showed an increase of 1.5%, while evening enrollments rose 10.4%; (3) weekly student contact hours increased by 3.1%; (4) LACCD students, especially evening students, continued the long-standing trend toward lighter class loads; and (5) female and part-time enrollments increased more sharply than male and full-time enrollments. Following district-wide data, tables are presented illustrating enrollment by category, student ethnicity, age distribution, admissions classifications, and sources of new students for each of the district's nine colleges. GLOSSARY

Average daily attendance (ADA) is a mathematical entity that is calculated from the hours for which students are enrolled at census. ADA is the basis for District funding.

Census is a fixed time during the semester when counts of enrollment and weekly student contact hours are taken for State reporting purposes. There are currently two census weeks per semester.

Day students are students who are taking one or more classes convening prior to 4:30 p.m.; the category thus includes students who are taking both day and evening classes.

Enrollment is a "head-count" of the total number of students in a college or District; enrollment, unlike average daily attendance,* does not reflect the number of weekly student contact hours* for which students are enrolled.

Ethnic status refers to racial affiliation as reported by students on a voluntary basis at the time of registration.

Evening students are students who are enrolled exclusively in classes convening at 4:30 p.m. or later.

Freshmen are students who, at the time of registration, have completed fewer than 30 semester units of college credit.

Full-time students are enrolled for 12 or more units during a semester.

Part-time students are enrolled for fewer than 12 units.

Sophomores are students who, at the time of registration, have completed 30 or more semester units of college credit.

Student Load refers to the number of weekly student contact hours (WSCH) per student.

Weekly student contact hours (WSCH) are derived by multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with 10 students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

DISTRICT PROFILE

DISTRICT PROFILE

Reversing last year's downward trend, enrollment in the Los Angeles Community Colleges in Fall 1979 rose to 130,896, a 5.1% increase over Fall 1978. All colleges, except City and ITV reported rising enrollments. The largest increases occurred at Southwest (up 22.8%), West (up 13.6%), and Mission (up 13.0%).

While daytime enrollment showed a modest increase of 1.5% Districtwide, there was a marked increase of 10.4% in evening enrollment (evening students are defined as those enrolled exclusively in classes beginning at 4:30 p.m. or later). East was the only college where enrollment changed counter to the trend; day enrollment increased greatly (10.6%) while evening enrollment changed little.

Weekly student contact hours -- the number of class hours in which students are enrolled each week -- increased 3.1%. Paralleling the enrollment increases, evening WSCH increased more than day WSCH (up 8.1% and 1.0%, respectively). Three colleges, City, Harbor, and Valley experienced small drops in total WSCH and at each of the colleges the drop is due to a decline in day WSCH.

Weekly student contact hours increased by a smaller percentage than enrollment, indicating that LACCD students, especially evening students, are continuing the long-standing trend toward lighter class loads. Student load, defined as WSCH per student, declined by 1.9% to 9.56. The college with the highest average WSCH load per student continues to be Trade-Tech, with its specialized, vocationally-oriented curriculum. The lowest WSCH load continues

DISTRICT PROFILE
(continued)

to be at Mission, with its dispersed class offerings.

It is possible to postulate a number of "causes" for the enrollment increases of Fall 1979, but it is extremely difficult to determine whether the postulated causes did in fact have any effect. For example, it can be said that a portion of the increases may have been due to the approximate 6.8% increase in the number of classes offered by the District in Fall 1979. However, class increases are an effect of enrollment increases as well as a cause. The relationship between classes and enrollment is thus circular rather than "one-way."

An additional factor in the Fall 1979 enrollment picture is the re-instatement of Summer Session in 1979. The pattern established over the past two years is that cancelling Summer Session, as was done in 1978, is followed by a drop in Fall enrollment; while offering Summer Session is followed by an increase in enrollment. However, there is no evidence that one situation directly causes the other.

Under legislation which covers community college funding for 1979-80 and 1980-81, funding of community colleges is again tied to enrollment levels. This follows one year of financing based on the target budget concept when state apportionment was not linked to enrollment.

Enrollment by Categories

Female enrollment increased more sharply than did enrollment of males. Females outnumbered males at every college but Trade-Tech, comprising 54.0%

DISTRICT PROFILE
(continued)

of the student population Districtwide.

Enrollment of part-time students -- those taking fewer than 12 units -- increased more sharply than did enrollment of full-time students; only one out of four students is enrolled full-time. City continues to have the highest percentage of full-time students (32.4%) while Mission had the lowest percentage (10.2%) in Fall 1979.

The District's ethnic composition changed little between Fall 1978 and Fall 1979. However, interpretation of ethnic trends is made difficult by the incomplete nature of the data. Ethnic information was available for only two-thirds of the District's students in Fall 1978 and for three-quarters of the students in Fall 1979. (Since ethnic status has only been collected on the application for admission since Spring 1977, it is expected that the percentage of students reporting this information will continue to increase in the future.) Districtwide, Whites continue to comprise the largest ethnic group with 39.0% of students. Blacks account for 27.4%, while 20.5% of students identified themselves as Hispanics and 10.3% as Asian.

Despite an overall enrollment increase, the number of students under 20 years of age declined Districtwide. Pierce had the largest group of students under 20 years of age (28%); Mission had the smallest group (12.1%). Two-thirds of the students are under 30.

DISTRICT PROFILE
(continued)

Comparative Enrollment

Preliminary estimates of nation-wide enrollment in all segments of higher education indicate an increase of 2.4% in Fall 1979 over Fall 1978, according to the National Center for Education Statistics (NCES). NCES also projects an increase in enrollment in public two-year colleges nation-wide from 3.9 million to 4.0 million, a 4.4% increase. Enrollment in California community colleges is estimated to increase from 6.0 to 6.5%, according to preliminary figures from the California Postsecondary Education Commission and the State Chancellor's Office.

Enrollment at community colleges in Los Angeles county but outside of LACCD declined very slightly. Long Beach and Rio Hondo had the largest declines (-7.3% and -11.4%, respectively), while Antelope Valley, College of the Canyons, and Glendale increased substantially (up 20.8%, 37.0%, and 11.8%, respectively).

Overseas Enrollment

The Overseas Program, now a part of Metropolitan College, the tenth college in the District, enrolls U.S. servicemen and their dependents at military bases throughout the Far East, in Iceland, and in the United States. Academic terms in the Overseas Program do not coincide with District semesters, but instead consist of five terms running year-round. Consequently, the numbers presented in this publication are for the complete years 1977-78 and 1978-79. Total enrollment for the 1978-79 school year shows an increase over 1977-78; however, the last two terms had decreased enrollment when compared with the prior year.
